

OBJECTIVES RESULTS

Consilium engaged with Plzeňský Prazdroj to develop a 5-year masterplan for Plzen brewery:

- 5.6m HL per annum
- 54.9 hectare site

The masterplan acts to provide a clear blueprint for Plzeňský Prazdroj to develop the entire brewery site:

- Meeting volume projections
- Delivering business service requirements
- Maximising opportunities to improve operational efficiencies
- Reducing risk & strengthening HSE aspects of the brewery
- Providing a framework to measure and benchmark performance

Consilium have created a centralised concept for the site plan:

- Increased parking capacity, leading to better control
- Centralised operational facilities, including offices and canteen, plus linked walkways and controlled access have been recommended to consolidate two currently independent breweries and packaging lines
- Logistics savings result in an **investment payback of 3 years** based on savings on external storage alone:
 - Consolidation of stock-holding location centrally
 - Reduced truck movements around site

In addition, Consilium have developed

- Implementation plan identifying clear steps on the road to delivery
- KPI framework for control and monitoring site performance

APPROACH
